Livingston, WI 53554

Dear Brian,

Students from Iowa-Grant Middle School just completed a natural resources education workshop at Trees For Tomorrow. These students received scholarship support from the Elmer G. Biddick Charitable Foundation. The students and we greatly appreciate your support in providing natural resources education.

Enclosed you will find student thank you letters, teacher evaluations, and a schedule of the workshop.

Thank you for your support!

Sincerely,

Maggie Bishop
Executive Director

Dear Mr. Brian Nodolf,

Thank you for your donation to Trees for Tomorrow allowing our school group to participate in this wonderful program.

My favorite class was survival skills because we learned how to build a fire, and with our skills, had a bon fire. I also enjoyed the trip to Bond Falls. It was incredible to see the water level and majesty of the falls.

I hope other children get to experience this wonderful and fun organization.

Sincerely,

Hannah Lindner

Dear Mr. Brian Nodolf,

Thank you for donating some money to Trees For Tomorrow for Iowa Grant to be able to get her. Because I think some people got here because of you and they are really thankful for that. I learned a lot of new things such as... how to steer a canoe, identify a deer and tree, how to work a GPS, how to prevent a survival incident, get to identify plants in Bog, and got to go to Bond Falls. Thank you so much.

Sincerely,

Hannah

Dear Mr. Brian Nodolf,

Thanks for The big donation to Trees For

Tomorrow. I learned a lot on this trip and without your help some of us would not be here. The thing I really liked learning about was Deer Ecology. Personally, I am a "Die Hard" hunter and I didn't even know this. There is a orbital gland. It's right above the eye. Also, they have another gland on their foot. So every time they take a step they give off a scent so predators can track them. The last thing is that some hunters say that when a buck takes a step two dots behind the foot get imprinted in the mud, snow, ect. The hunters say only bucks have the dots. There wrong. Since bucks are bigger, than does the bucks print gets printed. The does just don't weigh enough. All deer have the dots behind the foot. Thanks again for letting us come!

Thanks,

Parker

Roth

Dear Mr. Brian Nodolf,

Thank you for donating money for Iowa Grant to go to Trees For Tomorrow. I learned different things like there was a job called sawyers. I'm glad that I got to go to do more hands on stuff like we got to make a fire. I liked that we had the opportunity to go to Bond Falls and visit a bog. I am glad that I had the experience to come to Trees For Tomorrow and hope to come again.

Sincerely,

Madia
