

Dear Elmer G. Biddick Foundation,

On behalf of the Belmont School District, the 8th grade science class, and myself, THANK you very much for your generous contribution. It is because of your continued support we can offer this educational opportunity to the students of Belmont. THANKS again

Sincerely,

Belmont Science teacher

Dear Biddick Foundation,
 ON behalf of the eighth grade class
 I would like to thank you donating money for the trip!
 I learned how to tell trees ^{to} apart and to use a
 Compass right. I also learned that pruning trees can
 help them. We also learned how to start a fire
 with flint and steel. Learning how to use a GPS
 was very fun. I learned how useful a bog is. It grows
 plants and filters out chemicals and pollutants from run
 off water. Our class learned some different types of
 Constellations and how to find the north star.
 The night hike was extremely fun and exciting. The bog
 was fun to walk on, and it felt squishy. The
 Kovac Planetarium was pretty fun. It's the biggest
 planetarium. He built it himself and hand painted
 every star in the exact position! After we learned
 some new Constellations, we went outside and got
 to see the Northern Lights!

Sincerely,
 Seth Petas
