

Dear Elmer Biddick Foundation,  
I wanted to take the time to thank you for your generous donation to my Senior Project. With this grant I was able to purchase a hydroponic tower garden for Highland Community School. Using this Tower Garden I was able to learn about hydroponic gardening and grow multiple crops of lettuce to provide fresh produce for our School Lunch Program. Not only does this tower garden produce fresh lettuce it will be used in the future agricultural classes to help other students learn about sustainable gardening.  
Thank you!

Sincerely,

Kyle Doss
